MOHAMED ALI HUSSIEN

Helwan, Egypt | +20 115 861 8383 | malihussieneng@gmail.com | linkedin.com/in/mohame-ali-hussian

Career Object

Dedicated GIS professional with extensive experience in GIS development, spatial analysis, and enterprise geospatial solutions. Proficient in leveraging Esri technologies including ArcGIS Pro, ArcGIS JS API, and Utility Network. Driven to apply technical expertise, creativity, and problem-solving skills to deliver impactful geospatial applications.

Work Experience

Software Developer|| - *Giza Systems – **GDC** Department*
Sep 2023 – Present:

- Implemented and integrated AI chatbots using kore ai
- Create chatbot use kore.ai
- I worked as a Delivery Support with the GBS team in the GIS section
- Designed and developed integration solutions using WSO2 Micro Integrator connecting enterprise systems via REST and SOAP protocols
- Configured and published APIs through WSO2 API Manager, managing API lifecycle and access policies
- Contributed to a government-scale integration project for NTRA (National Telecommunications Regulatory Authority) — Egypt's Ministry of Communications
- Developed low-code applications using Out Systems platform for internal business processes
- Built basic Out Systems modules and forms supporting enterprise workflows

GIS Developer | *Asyad Capital for IT & Communication (Remote) – Saudi Arabia*
Apr 2025 – Nov 2025:

- building GIS Solutions using ArcGIS JS API
- Worked on the **Forests Project** as the main project and contributed to the **Al-Sharqia Project** to resolve several technical issues

GIS Developer | *Mdarj (Freelance) – Egypt*
Feb 2025 – Aug 2025

- Developed mapping integration for Hajj Platform using Esri JavaScript API, enabling interactive visualization of camp locations and real-time data insights.

Solution Engineer (Utility Network) | *Geo Solutions (Freelance) – Oman*
Aug 2024 – Oct 2024

- Created a Database Utility Network Especially for the Electricity Network in Oman
- Mapping between geometric network and utility network
- Migration between geometric network and utility network
- Management and handling of the Dirty area

GIS Analyst | *Edreesy Geospatial Solutions (Freelance) – USA*
Aug 2022 – Jul 2024

I have worked on several project in several regions in Saudi Arabia, including **:**

- ALULA & NEOM
  - Download DEM-30M & 90M use USGS & SRTM
  - Spatial analysis (The Aspect-Slope function creates a raster layer that simultaneously displays the aspect and slope of a surface
  - Using Living Atlas- ArcGIS Pro - Download :(World Eco physiographical- Soils Harmonized World Soil Global – World Terrestrial Ecosystems- Terr RaR- Global- Vegetative Communities)
  - Make Layout maps for everything in the project

Solution Engineer | *Quality Standards for Information Technologies – Enterprise Unit*
Oct 2022 – Oct 2023

- Working in Enterprise Unit, focus in deployments & configuration of Esri core technologies
- Building App use Arc GIS App Studio
- Create VR and AR use Unity Platform Esri
- Esri Utility Network Implement that including Data modelling and migration
- Create Scenario use ArcGIS Urban
- Create 3D model use City Engine and configure 360VR Esri

Egyptian Gas Holding Company (Utility networks)

A project to deliver natural gas to areas most in need, which aims to improve the quality of life and develop facilities and infrastructure

We created a unified database for the natural gas network that included all components of the network, and uploaded data on 11 million household customers on the utility network. This ensures the facilitation of the process of making decisions based on strong foundations and accurate information

performed during the project:

- Create Data model Utility network Gas
- mapping between geometric network and utility network
- migration between geometric network and utility network
- management and handling of the Dirty area
- Analyzing and reviewing acquired **SRS**
- Analyzing data based on **SRS**, and identifying areas in need of gas
- Create model builders to sign most assets on the network

Technical support | *for many different ideas proposed* **-** *by the company Quality Standards for Information Technologies - In Department Of Data Unit*
Dec-2021 - Oct-2022

- CITY GML (3D)
- Share the data on cesium

GIS App Developer | *TransformologyXR (Remote) – UK*
May 2022 – Nov 2022

- Creating interactive Visualization Using API js Esri
- GIS Data preparation
- Research and Development in ArcGIS and Smart City Application

Egyptian Electricity Holding Company (EEHC)
Data Conversion Specialist | *Quality Standards for Information Technologies – EEHC Project*
Oct 2020 – Dec 2021
The objectives of "EEHC" Project are Build an Integrated Information system for some DCCs around republic, The first lot of project contains 5 DCCs. The following activities is being performed during the project:

- Analyzing and reviewing acquired Abs
- Identifying proper source of attribute such as Material Transmittal Submittal (MTS), Single Line Diagram(SLD)….etc.
- Cleansing of AB Drawings.
- Mapping "identify destination feature class /field that shall host migrated objects"
- Convert AB Drawings.
- Migrating converted objects into EEHC unified Data Model.
- Validating Migrated Data.
- Maintain Connectivity and integrity of utilities geometric network.
- Check Electric feeder manager by Arc FM.
- Create Tracking sheet.

Basemap Production for Ministry of interior Egypt (MOI)
GIS Editor | *Ministry of Interior (MOI) – Quality Standards for Information Technologies*
Mar 2020 – Oct 2020
The objectives of "MOI" Project is Build a base map for some areas around the republic. The following activitiesis being performed during the project:

- HRS satellite images acquisition, geo-referencing and processing.
- Base map digitization from acquired satellite images.
- Data conversion for scanned maps.
- Support Network

Education

April 2021 – Aug 2021

Information Technology Institute (ITI), Ministry of Communications and Information Technology (MCIT).
Track: Geoinformatics (GIS)
Branch: Qena

SEPT.2014 – JUN.2018
BA of Arts, Faculty of Arts, Helwan University
Accumulative Grade: V. Good. Rank (fourth)
Graduation Project: The sustainable development of Matruh Governorate
Project Grade: Excellent

Certification

- WSO2 Certified Micro Integrator Practitioner- V4
- Experience optimization platform Developers basic training , kore ai ,certified(2023)
- Experience optimization platform Developers advanced training , kore ai ,certified(2023)
- FME Desktop :Data Translation for AEC, LinkedIn Learning(2022)
- Introduction front end Developer , Meta (2022).
- Introduction Back end Developer , Meta (2022).
- ArcGIS Pro Essential Training , LinkedIn Learning (2022)
- Real-World GIS , LinkedIn Learning (2022)
- Learning QGIS , LinkedIn Learning (2022)
- InfraWorks and ArcGIS: AEC Collaboration, LinkedIn Learning (2022).
- Online course in Learn GIS Database From early to professional, Udemy (1/1/2021).
- Online course in Database Fundamentals, Mahara-Tech (2020)
- Font-End-Developer, Route (1/8/2020 to 1/12/2020)
- Online course in Python programming basics, Mahara-Tech (2020).
- GIS Developer Engineer Diploma, P-community (2020)
- A training course at Geographic Information System Advanced Analysis (6/2017).
- A training course at Geographies Information Systems using Arc GIS Desktop 10 & Google Earth pro program (8/2016)

Technical Skills

- Technical Skills
  ArcGIS Pro, ArcGIS JS API, ArcGIS AppStudio, CityEngine, Utility Network, QGIS, GeoServer, Python, JavaScript, React.js, HTML, CSS, Bootstrap, SQL Server, PostgreSQL, Leaflet

- Soft Skills & Languages
  - Self-Learner | Teamwork | Problem Solving | Work Under Pressure
  - Languages: Arabic (Mother Tongue), English (Intermediate)

Personal Information

- Nationality: Egyptian
- Military Status: Completed
